# ATTENTION

## **NEGRO FARMERS!**

### **PLANT A GARDEN THIS YEAR**

#### **More And Better Gardens For Negro Farmers**

**Campaign Period—April 15th to April 25th**

#### **Home Grown Vegetables Contribute to Better Health and Reduce Living Expenses**

Scientists have found that certain food elements in vegetables are necessary for best health and normal growth. Vegetables can be produced at little cost and with only a few hours of labor and attention. The garden provides food that otherwise must be bought and paid for. It reduces the cost of living.

#### **A Garden Beautifies the Homestead**

That unsightly vacant spot near the house or in the back yard will grow up in weeds when not cultivated. A well planned, well cultivated garden is more beautiful than a straggling growth of weeds in an ill-kept yard. Weeds yield no returns.

#### **Use Your Spare Time Profitably**

The garden is not entirely for the farm wife—men must help. You can make it pay. Idle minutes can be put to good purpose.

#### **Remember the Dates—April 15th to April 25th**

Get the soil ready; prepare the seed bed; manure and fertilize; plant good seed and cultivate throughout the year. Men, women and children should all take part in this campaign.

**Write the Agricultural Extension Service,  
Raleigh, for Free Bulletins on Gardening  
or See Your Farm Demonstration Agent**

*County or Local Agent.*
